International Data Group¹ estimates that over 70% of the critical data small to medium sized businesses use every day are now stored on a PC. This includes e-mail and attachments, contacts, patient and customer records, and business documents.

According to the US National Archives and Records Administration², 93% of all companies that lost access to their data for 10 days or more due to a disaster filed for bankruptcy within one year of the disaster. 50% of the organizations that went without data management for the same time period filed for bankruptcy immediately.

What effect would a loss of critical data have on your company?

Get Continuous Data Protection With SAFE™

Stafford Associates Computer Specialists, Inc. File Ensure™ (SAFE™) provides small to medium sized businesses and individuals with a platform independent, efficient, and highly secure method of file backup, restoration, and business continuity – with point-and-click ease of use.

Implementing SAFE™ for your business is fast and easy. Simply download and install the SAFE™ client software, enter your login information, select the folder and files to backup, and choose the time of day you would like your fully automated, unattended backup to occur. SAFE™ takes care of the rest.

Optional Modules

SAFE™ also provides optional support for backups of Microsoft Exchange Server or Mailboxes, SQL Server, Oracle, MySQL, and Lotus Domino/Notes Server.
